

CORE DRILLING

DIAMOND Cores

Bantam FAST CORE drill bits offer a new technology in diamond bit design.

Bantam Fast Core drilling bits are manufactured with a kerf thickness half that of most common bits allowing less feed pressure. This design cuts less material with enhanced cutting power.

The combination of all these elements allows for faster coring.

Equipped with suction gage and air flow adjustment knob for precision drilling control.

Built-in Neoprene vacuum seal for suction adhesion. Use on concrete, pavement and most surfaces with equal or similar porosity.

Quickly install sign posts on raised curbing. Easily bore 8" cores for V-Lock type sign supports.

Vacuum pump assembly with suction gage.

PRECISION Drilling core machines

TOOLS

Drill 1" up to 10" holes with a Bantam diamond core drilling rig.

High powered precision tilting DRILLING PRESS is an easy to use diamond core drilling machine capable of coring marble, granite, concrete, rebar and asphalt from 1 inch up to 10 inches easily. Designed for quick set up, the Bantam SEL has a telescoping multi positioning strut enabling instant inclines and stability.

Easy clip-on water line assures constant water flow for prolonged bit life.

In addition to its powerful 20 Amp motor and three drilling speeds, the Bantam 1000 SEL has been designed to compliment Reflector glass curb and pavement marker installations with its dual handles, rear wheels, and easy turn hand knobs for instant stability and functionality.

FEATURES

- Single man wall drilling
- Quick tilt for angle drilling
- Instant inclines and stability
- Built in hole locator
- Easy clip-on water line
- Built in vacuum pad
- Overload protection
- Telescoping multi positioning strut

SPECIFICATIONS

- Core sizes: 1" to 10" Holes
- Amps: 20
- Gear box: 3 speed,
- RPM Speeds: 400 - 600 - 1200
- Maximum Height: 36"
- Base: 10 1/2" x 15 1/2"
- Weight: 65 lbs

Item	Item	Price
USR-B1000-SEL	Bantam B1000 SEL Drill rig 1" to 10" holes	\$2995.00
USR-V-PUMP	Bantam vacuum pump	\$ 595.00
USR-BT-2	*Bantam 2" Onestep™ drilling core diamond bit	\$ 649.00
USR-BT-4	*Bantam 4" Onestep™ drilling core diamond bit	\$ 450.00

Specifically designed for Reflector 2" and 4" glass markers

TE 76

Requires BU
type bit

\$ 9800.00
Item # USR-MDM-01

Holotool TE 76 Core rig system has been specifically designed to quickly hug curbs for precise hole drilling.

Utilizing the same electrical components as the DD 160E, the TE 76 has been equipped with a reinforced transmission and ground support platform.

The TE 76 Core rig system is recommended for continuous installations of both curb and pavement markers.

Features

Quick adjustment to curb edges
Workable foot platform designed specifically for curb marker installations.

Benefits

Service indicator light to prevent motor damage. 3-speed gearing for optimized core drilling speed. Mechanical slip clutch for motor protection.

DD-BU quick-release chuck
No tools required for operation.

DD 160 RIG

Requires BU
type bit

\$ 2740.00
Item # USR-DD-160

DD 160E is a multi function drill press for drilling precise core holes from 1 inch to 9 inches in diameter.

Drill steel-reinforced concrete, natural stone, masonry and asphalt. DD 160 is powered by a 115 V, 2000 watt motor with three functioning speeds: 500, 1000 and 2000 rpm's.

Use for both curb and pavement marker installations.

DD 130 RIG

Requires BI
type bit

\$ 2220.00
Item # USR-DD-130

Versatile, mobile and efficient
Cores quickly and neatly into reinforced concrete, natural stone, masonry and asphalt Designed for both wet and dry coring without modification. Can be set up and operated easily by one individual. 1800 W motor with plenty of reserve power. 3-speed gearing For optimum coring performance. Fits 15/32" to 6" Diamond cores. COMPLETE RIG KIT Includes: DD 130, drilling rig, water tank, wheels and 2" & 4" core drilling bit: \$3450.00

DIAMOND CORE DRILLING RIGS AND EQUIPMENT For glass curb and pavement markers

Diamond core drilling equipment and machines designed to install glass curb and pavement markers quickly and effortlessly.

Holotool TE 76 is our top of the line drilling core machine specifically designed to install large volumes of curb markers. The DD 160 offers multiuse drilling with a 1 to 9 inch wide core capability. The DD 130 is a lightweight easy to use drilling core that is easy manageable and cost effective. Drilling rigs with recommended diamond drilling cores offer precision drilling characteristics design to support and secure Reflector glass curb and pavement markers.

DIAMOND CORE BITS

CURB MARKER DIAMOND CORE BITS

Wet Diamond Core Bits are designed to drill reinforced concrete, natural stone, masonry and asphalt.

Opti-Curb Markers require "Holotool" diamond core drill bits built with a countersink cutting head to assure proper curb marker installation and positioning.

360° Markers require a 4 1/4" inch diamond core bit.

2" DIAMOND CORE BIT

Item #	Description	Price
USR-DD-BI-25	Holotool / Hilti	\$ 490

4" DIAMOND CORE BITS

4 1/4 inch diamond core drill bit for installing 360 and 180 degree pavement markers.

Item #	Description	Price
USR-DD-BI-4	Hilti	\$ 475
USR-DD-BI-6	Hilti	\$ 555
USR-DD-BI-8	Hilti	\$ 750

ACCESSORIES

Item #	Description	Price
USR-DCM-1	2.5 Gallon tank	\$ 261
USR-WHEELS-2	DD 130 Rig	\$ 98
